Slide 5: Core Features

1. Data-Driven Testing Capability

Allows the framework to fetch testing inputs directly from external CSV files without changing the code.

VIVA Hint: CSV file lendhu automated-ah data-va eduthu multiple values-ah test panna mudiyum.

2. Automated Element Locator Management

Uses robust XPaths and IDs to accurately find web elements like buttons and text fields.

VIVA Hint: Webpage-la irukura login buttons matrix element-a correct-ah select pannum.

3. Smart Validation and Assertions

Compares the expected results from your plan with the actual output automatically to mark Pass/Fail.

VIVA Hint: Expected results-um actual results-um correct-ah match aagudhanu script-eh pathukum.

4. Robust Error Handling and Logging

Catches runtime exceptions cleanly and records error logs to prevent sudden script crashes.

VIVA Hint: Error vanthaal framework crash aagama clean-ah log-la record pannidum.
