Slide 7: Database / ER Diagram Model Layout

This document contains the exact structural components and relationships for Slide 7 of your final year testing project presentation. Use these structured points and relationships directly in your presentation layout.

1. TEST_SUITE Table (Primary Directory)

• **Purpose:** Stores the overarching test suite classifications (e.g., Smoke Suite, Regression Suite) to organize individual test runs.
• **Attributes:** Suite_ID (Primary Key), Suite_Name, Created_Date

> *Viva Guide Speak: Total testing folder classification metadata details-ah store panra primary root table idhu.*

2. TEST_CASES Table (Functional Test Records)

• **Purpose:** Automatically stores every single test case row parsed sequentially from your external input CSV file.
• **Attributes:** Case_ID (Primary Key), Suite_ID (Foreign Key referencing Test_Suite), Description, Expected_Result
• **Relationship:** Connected to TEST_SUITE via **One-to-Many (1 : N)** relationship (One suite can hold multiple test cases).

> *Viva Guide Speak: External CSV file lendhu fetch panra ovvoru test case execution details-um mapped records-ah save aagum.*

3. EXECUTION_LOGS Table (Live Output Tracker)

• **Purpose:** Dynamically captures runtime testing evaluations and assertions directly generated from Selenium execution.
• **Attributes:** Log_ID (Primary Key), Case_ID (Foreign Key referencing Test_Cases), Actual_Result, Execution_Time, Status (Pass/Fail)
• **Relationship:** Connected to TEST_CASES via **One-to-Many (1 : N)** relationship (One test case can be run multiple times, generating separate logs).

> *Viva Guide Speak: Script run pannoamna browser automation kudukura live actual outputs matrix details dynamic-ah record aagum.*

Quick Structural Blueprint Reference Table:

Table Entity	Key Identifiers	Core Relationship Mapping
TEST_SUITE	Suite_ID (Primary Key)	Root Class Entity
TEST_CASES	Case_ID (PK) | Suite_ID (FK)	One-to-Many (From Test_Suite)
EXECUTION_LOGS	Log_ID (PK) | Case_ID (FK)	One-to-Many (From Test_Cases)
